Copy of para.3 of Memorandum from the Koodbidri Congress Committee dated 17-9-1[illegible] to the Hon'ble Minister for Public Works, Madras:-

--

XX XX

This town is surrounded by many villages which have vast acreages of agricultural lands and the mainstay of the villagers is the agricultural industry. Today our country is groaning under the pressure of starvation and a total war waged on the food shortage will save the country at this critical time. On an occasion like this we would invite the attention of the Government to the following few possibilities which will contribute substantially to the food resources of the District, if carefully worked out. Irrigation drainage, good seed, manure and the correct use of these things play a vital part in crop productions.

The ill drained Patla lands extending from Belvai to Puthige village - about two miles from Koodbidri town - measuring about 700 acres is capable of giving at present only one crop of paddy annually. The deepening of the drainage channel on one side of this strip of Patla and the protection by improving the already existing bund at a cost which will not exceed Rs.60,000 will very easily convert the whole strip of this land into first class three crop area thus resulting in an additional yield of 700 tons of rice - annually - the drained water from these channels can be lifted to irrigate 100-200 acres on the other side and an additional yield of 100 tons of rice can be effected. At least 500 acres of single crop wet lands can be brought under three crops annually by sinking tanks and wells.

Copy of minutes of H.M.(P.W) ---
Secretary, P.W: "May be seen. The position has been expalined".

EXTRACT from the Memorandum submitted to the Hon'ble Sri M. Bhaktavatsalam, Minister for Public Works, Government of Madras, now on a visit to Moodbidri, South Kanara District.

The Moodbidri Congress Committee, on behalf of the Citizens of Moodbidri submits the following facts for the consideration of the Honourable Minister:-

Dev Cro 36344 P&D(I)/57 2574/50

xx xx xx

4. Bunds across some valleys in the surrounding villages can save several thousands of acres from soil erosion at the same time furnish water to the surrounding parched up lands to be brought under food crops. Hence we need some technical knowledge which we can expect from technical men if they are directed to this place. Here again we would suggest that technicians with some of the officials of the District can co-opt some able local men and consider the possibilities of organising food front. ~~In elevated xy dry lands wells and tube wells will go a long way in helping the ryots. A few tube wells can be tentatively granted and the possibilities viewed.~~ The above facilities will enable this area to produce at least 5,000 more tons of food annuall

Sub: Soil Erosion - South Kanara District - Prevention of.

Ref: Government Memo No.36344-P&D -II/50-1 dated 1-5-50.

....

I submit the following report on the reference cited above.

The Valleys mentioned in the Memorandum submitted by the Moodabidri Congress Committee to the Hon'ble Minister for Public Works are in Belavai and Puthige villages of Moodabidri Firka. A stream about 20 to 30 feet wide runs through these villages and the lands on either side of this stream are generally submerged during the rainy season and the owners of these lands are not able to raise the I crop paddy. They are patla lands and only one crop is raised in these lands during November-April. The stream is now silted up and it runs from North ~~and~~ to South about half a mile and turnstowards west and runs 2½ miles upto Anadka. The strip of land that is usually submerged during the rainy season is about 3 miles long and 150 to 200 feet wide. The total area would be about 100 acres. To divert the rain water, some of the owners build temporary mud dams and cultivate small strips, but very often these bunds are washed away by rain water and the crops are damaged. In addition to this, a lot of soil erosion also is taking place.

A 2. The owners of these lands now want that the Government should deepen the stream upto 3 feet below the field level and build strong bunds on either side of this so as to prevent the water from getting into the fields. Further they want that at the top of the valley a strong embankment also should be built to retain water which could be utilized for irrigation purposes later on.

B 3. The Irrigation department may perhaps inspect the area and formulate a scheme.

Copy of letter No. 685 I dated 31-3-52 From the Superintending Engineer, Coimbatore, To the Chief Engineer, P.W.D. Irrigation.

Sub: Irrigation - South Kanara District - Moodbidri Drainage Channel - Deepening of.

Ref: Correspondence ending with this office No. 458 I dated 1-3-52 on Govt. Memo No. 4351-A/49-2 dated 27-8-49 and No. 3388 I/50-1 d/21-7-50.

....

The following are the points raised by the Moodbidri Congress Committee in itsmemorandum submitted to the Hon'ble Minister for Public Works:-

i) Deepening of the drainage channel and improving the bunds on the banks of the channel.

ii) Possibility of lift irrigation.

iii) Sinking of wells and tanks.

iv) Construction of bunds across the valley to prevent soil erosion and also to store water for irrigation.

Regarding point (ii) above, I have to state that there is no possibility of lift irrigation in the area since the nature of the country is such that there are no compact blocks of even 100 acres in extent at one place and a large number of pumps will therefore be required, thus rendering the irrigation costly.

The subject of sinking of wells falls under the well subsidy scheme of the Government and as such I presume that it does not need to be investigated by the Public Works Department.

The forming of tanks by cross bunding the valley does not appear to be a profitable proposition, since there is the likelihood of submersion of considerable extent of fertile lands, the acquisition of which will be prohibitively costly in comparison to the meagre benefits accruing.

The soil erosion complaint of the petitioners has been found to be only scouring which is nothing extraordinary in South Kanara and as such calling for no special protective measures.

The question of deepening the drainage channel and strengthening the banks has been investigated in detail by the Executive Engineer South Kanara and detailed plans and estimate are submitted herewith.

The estimate has been worked out at Rs. 1,90,000/- for works only and at Rs. 2,47,090/- including direct and indirect charges. In view of the huge cost of the scheme when compared to the ayacut of 89 acres benefited thereby, I have to recommend that the scheme may be dropped.

Copy of letter No.D.Dis.8872/52 dated 7-6-52 from the Collector of South Kanara, Mangalore to the Superintending Engineer, Coimbatore Circle, Coimbatore.

Sub: Irrigation - South Kanara District - Moodabidri drainage channel - deepening of - proposals - remarks.

Ref: Your copy of letter No. 685 I d/31-3-52.
2. From the Revenue Divisional Officer, Coondapur No.N.Dis.2948/52 dated 2-6-52.

I agree with your report to the Chief Engineer, P.W.D. Irrigation, Madras cited first above. Enquiries held in this case show that the scheme relating to the deepening of the Moodabidri

p.t.o.

drainage channel is not worthwhile taking up in view of the heavy cost involved and the comparatively small ayacut to be benefited thereby.

Issued as Memo. No 3388 J/50-1 dt. 21.7.50.

P.W.D.(J.I.).

C.No.4183 J/49.)

From the C.E.(I) No. 5339/49-B-36. dated 27-8-1952.

In their Memorandum ~~dated~~ dated 17-9-49 submitted to M (P.W.) the Moodbidri Congress Committee, South Kanara District, made, among others, the following suggestions relating to this Department.

(1) Deepening of the ~~damage~~ drainage channel in the village to afford better drainage of the lands and protection of its banks by improving the bunds.

(2) Using the drainage water for lift irrigation of other lands; and

(3) construction of bunds across the valley to prevent soil erosion and also to store water for irrigation.

2. The C.E.(I) to whom the matter was referred has forwarded a copy of a letter from the S.E., Coimbatore, to him. The suggestions of Congress Committee are examined below in the light of the remarks of the S.E.

(1) Deepening of drainage etc. The S.E. has stated that an estimate for Rs. 2.47 lakhs including direct and indirect charges for deepening the drainage and strengthening its bund has been prepared. He has however recommended that the proposal may be dropped in view of the huge cost when compared to the ayacut of only 89 acres which will be benefited by the scheme. The Collector and the C.E.(I) agree with him.

(2) Using drainage water for lift irrigation.

The S.E. has stated that there is no possibility of lift irrigation ~~within~~ in the area as there are no compact areas of at least 100 acres in extent at one place and hence a large number of pumps would be required, thus rendering irrigation costly.

(3) Construction of bunds across valley.

The S.E. has reported that forming of ta

4 J

by cross bunding the valley does not appear to be a profitable proposition, since there is the likelihood of submersion of considerable extent of fertile lands, the acquisition of which will be prohibitively costly in comparison with the meagre benefits accruing. He has also stated that the soil erosion complained of by the petitioners has been found to be only scouring which is nothing extra ordinary in South Kanara and as such calling for no special protective works.

In the above circumstances no further action seems called for in this. The papers may be recorded in a Memo. Revenue may see.
